International Conference on the Role of Polyamines and their Analogs in Cancer and other Diseases

Tivoli (Rome), Italy     September 10-14, 2006

Organizers

Enzo Agostinelli, University of Rome “La Sapienza”, Italy
Kazuei Igarashi, Chiba University, Japan

Scientific committee

E. Agostinelli     (Rome, Italy)
L. Calabrese      (Rome, Italy)
R. Casero         (Baltimore, MD, USA)
A. Finazzi-Agrò   (Rome, Italy)
E. Gerner         (Tucson, AZ, USA)
K. Kashiwagi      (Chiba, Japan)
K. Igarashi       (Chiba, Japan)
R. Ientile        (Messina, Italy)
S. Matsufuji      (Jikei, Japan)
A.J. Michael      (Norwich, UK)
T. Oshima         (Tokyo, Japan)
H.M. Wallace      (Aberdeen, Scotland, UK)

Topics

Biochemistry and physiology of polyamines
Functions of polyamines in cell growth and differentiation
Biological actions of polyamines
Pathophysiological functions: cancer
Clinical aspects of polyamines: therapeutic strategies
Polyamines and diet

The Meeting entails four days of presentations and oral poster discussions. It will focus on several important issues relating to the biochemical and pathophysiological properties of polyamines.

The Conference will take in account the biosynthesis and catabolism of polyamines, their essential role in cell growth and differentiation in animal, plant and microorganisms as well as their role in several pathologies with special emphasis on cancer.
